

THE EMPRESS EXPRESS

VOLUME XVII. No. 17

EMPRESS, ALTA. THURSDAY, Sept. 26, 1929

Price: \$2.00 Per Year.

United Church

Church School, 10.30 a.m.
Public Worship, 11.30 a.m.
A Special Rally Day Service will be conducted, at which several will unite with the church. This act of consecration is a forward step in the soul's progress toward the city of God.
A similar service will be held at:

Leland Hall, 3.00 p.m.
Social Plains, 7.30 p.m.
We invite you to make a special effort to attend this reunion service and worship with us.
Rev. Geo. A. Shields,
Minister.

Will Everybody Do Their Bit

Next Saturday, September 28, the I.O.D.E. will stage a tag day for benefit of the Red Cross Sick Children's Hospital. It is a very worthy cause and one and all are asked to help to raise a good donation.

TENDERS FOR SCHOOL HOUSE

Sealed Tenders will be received by the Board of Trustees of Acadia Valley School District No. 3078 at the office of the Secretary-Treasurer up to noon, October 10th, 1929, for the erection of a two-roomed frame school building after Plan Number B-7. Plans and specifications may be obtained from Secretary-Treasurer on payment of a deposit of \$5.00. Plans must be returned within 14 hours, and deposit will then be refunded. A marked cheque for five per cent of the amount of tender should be enclosed with each tender as a guarantee that same is "bona fide." The lowest or any tender will not necessarily be accepted.

(Mrs.) L. M. PERES,
Secretary-Treasurer.
P.O., Acadia Valley.
Nearest Station, Acadia Valley.

FLY -- AVIATION IS GROWING

The biggest opportunity of the century awaits those who prepare and train now. Be an active student at home, gaining a knowledge of design and construction, navigation, instruments, meteorology, theory of flight, etc. A wonderful course prepared by expert instructors; rates are very low.

The Richard Kent Stock Co. To Present, "Money Mad"

The Richard Kent Stock Co. will appear at the Empress Theatre on Monday evening with their second presentation entitled, "Money Mad." This play features Mr. Charles Varley, as a Southern Dandy, in one of the greatest black face parts ever written. This is a four-act comedy drama. A feature of the evening's entertainment is the presence here of Miss Annie Abbott, the little Georgia Magnet. There will no doubt be a good attendance to see this Company's re-appearance as the public were delighted with their last performance.

Has Narrow Escape

Sunday morning, Levi Barker, who lives in the irrigation block, south of the river, was returning from attending church service at Steevehill, when his team became frightened. A feature of the evening's entertainment is the presence here of Miss Annie Abbott, the little Georgia Magnet. There will no doubt be a good attendance to see this Company's re-appearance as the public were delighted with their last performance.

Be sure the new friend is better than the old one before you exchange.

Gas And Oil At Fuego Well Important Strike

The news of the gas and oil strike at the Fuego well, north-west of town on the C.P.R. Coronation survey has caused a stir of excitement. There has been much press comment, and although figures are not yet available, a great deal of importance is attached to the discovery.

The information as contained in our last issue proved correct. After the hole had been cleaned, very little work was done with the drill before a tremendous pressure of gas escaped itself. A 15,000,000 foot flow of gas belched forth, which later sprayed crude oil over the derrick and things laying around about.

What is regarded as of chief importance in the strike is the fact that the crude oil is coming from the lime. This is regarded as a feature of special importance, being the only well that this can be said of in Alberta.

On Saturday we visited the well site. The well was under control, but we saw for a brief period when the control was released, a column of smoke-like gas appear with a roar and hurried near to the top of the derrick. The operator below, when he emerged, spattered all over with the spray of oil thrown by the gas.

On Sunday, it is reported that there was a big throng of people to the drilling site, also two airplanes from Calgary were present.

To Re-commence Drilling

J. N. Anderson was a visitor to the Fuego Oil Co.'s well on Wednesday. He said that the Co. are making arrangements to drill another well. They are expecting to have to drill the present well another fifty feet and were prepared to re-commence drilling operations this morning. Pipes have been laid from the casing to carry off any excessive gas pressure that may be struck.

Mr. and Mrs. D. McEachern and Mr. and Mrs. M. McGill, were guests of Dr. and Mrs. A. L. Caldwell, at Cabri, over the week end.

We charge hereditarily with our faults, environment with our mistakes, and as an offset credit ourselves with all our virtues.

Monday, Sept. 30

Admission: \$1, 50c, 25c.

Double Wedding

A very beautiful double wedding was solemnized on Tuesday afternoon, Sept. 24th, at the home of Mr. William Murdoch, when Mr. William Murdoch was united in marriage to Maria Simpson, and William Loughbridge was united to Isabella McEwen. Rev. Geo. A. Shields officiated. We join in the general wishes to the happy couples of long and happy futures.

New Geranium Variety

The Canadian Horticultural Council announces the full registration of a new geranium, "Stirling." It was produced by the late John M. Baldwin, of Bowmanville, Ontario, from a cross between the variety Zonal and ivy-leaf geranium. It bears a double flower of a beautiful rose-shade, bearing six stamens. The foliage is dark green and ivy-leaf in shape, while the branches are short-jointed and are of spreading rather than pendant habit. The plant is particularly desirable for pot and greenhouse culture.

At the same meeting of the Council the official record Number 102 was granted to a new pear bearing the name of "Stirling." The variety is a product of a scion from a Baume d'Artois grafted on a French seedling. The tree is a heavy cropper, bearing fruit inclined to be round with a deep purple blush. It was originated by J. H. Baker of Vernon, Brit. Columbia.

Mrs. W. MacPherson, and daughters, Marion and Corinne, who have been holidaying with relatives in the States, returned on Monday night.

Weather of the past few days has been cloudy and wet. The rainfall has been most welcome after the lengthy period of dry weather. However, heavy precipitation will be needed to put the land in shape for next season's crop.

Mrs. DeDally who has been with the Standard Clothing Co. here since the opening of the store, left this morning for Vancouver, having received word of the serious illness of her father who is a returned veteran.

A Good Time Now to HAVE THAT REPAIR JOB DONE

N. D. Storey "The Ford Man"

The Ripening of Green Tomatoes

In some sections there is a considerable demand for ripe tomatoes after the season for this crop is normally over. This requirement may successfully be met by artificially ripening the fruits indoors. Fruits that are to be ripened should be well grown, free from blemishes, such as splits in the skin, bruises or frost injury. It has been found, however, that the very green fruits will not make a desirable finished product. Therefore, the tomatoes should be allowed to mature as far as possible. If such fruits can be saved and stored in a moderately cool room, at about 60 to 65 degrees, they will be found to ripen nicely over a considerable period.

There are several methods of handling the fruits, and which probably the following are the best. The fruits should be wiped free of all sand and graded into near ripe and quite green and wrap them in tissue paper, after which they should be placed in single layer on a shelf, or in baskets. Some prefer to place the fruits on the shelves or in the baskets with no wrapping, either method is quite satisfactory, although the fruits wrapped with paper will be found to wither less than those put to ripen without wrappers.

Then there is the ethylene gas method of ripening. This requires of ripening requires special equipment such as a gas proof room into which the fruits are packed on trays or in baskets. The gas can be used at varying concentrations, varying from one cubic foot of ethylene gas to 500 cubic feet of air, to one cubic foot of gas to 1000 cubic feet of air. The temperature of the ripening chamber should be maintained around 65 to 70 degrees. In six days ripe tomatoes can be obtained—Experimental Farm Note.

Anglican Harvest Festival Services

The Harvest Festival Service at St. Mary's Anglican Church, was attended by a good sized congregation. Rev. H. J. Hancock, of Cabri, conducted the service and spoke regarding the work of the Rev. E. A. Torrance, in laying the foundation of the church here, and that the people should see to it that his work was not allowed to go to waste. He also conducted Harvest Festival Service at Mayfield.

Mrs. Salzweid, who was a patient in the local hospital, returned to her home at Buffalo, last Friday.

Consequent on the report of the gas and oil strike north, it is said that a company is being organized to drill at Oyan.

The Richard Kent Stock Co. appear at the Empress Theatre on Monday in the comedy drama entitled, "Money Mad." Miss Annie Abbott, the little Georgia Magnet, is a feature of the bill.

The Ladies' Aid of the United Church will hold their next meeting at the home of Mrs. Fountain, October 3rd.

Says Conflict Of Interests At The Hague Conference Will Not Affect Entente

The Hague—Despite the conflict of interests at the reparations conference which has just concluded, the friendly relations between Great Britain and France will continue as before, Rt. Hon. Arthur Henderson, British foreign secretary, said in a statement issued just before he left The Hague.

Mr. Henderson's statement was "Some irresponsible people have been pretending in the last few weeks, that there was likely to be in future, a want of cordiality or confidence between the present governments of Great Britain and France. Because in our conference there has been some frank speaking they can detect a coldness, even hostility, in the relations of the French and British delegations."

"If there is any such suggestion it is absurd. It is the invention of an over-heated imagination. I say for myself and for my colleagues in the British Government, without exception, that we desire our policy shall be continued upon a basis of the closest international co-operation with the other governments of the world."

"But we know that the co-operation we hope for can only give results when the general relations between the governments are based on frankness, confidence and cordiality. We desire to have such relations with every nation but above all with our closest neighbor, France. However services to our common civilization and the world we appreciate as they deserve appreciation."

"We have many interests which are the same and which we can only promote by common action. Speaking for myself, I had no other than weeks an opportunity of seeing Premier Briand at Paris. I want to say how deeply I appreciate the spirit with which he and his colleagues have done all their work. He made me see more clearly than before what he means by his policy of reconciliation and understanding."

"I believe that what we have done at The Hague in securing the evacuation of the Rhineland by general agreement and in other political work is only the beginning of our collaboration."

"I hope from now onwards we shall work together with our French colleagues and the representatives of other friendly nations and secure their whole-hearted co-operation in carrying through a general treaty of all-round disarmament, to which we are pledged and in making the League of Nations the living power it ought to be."

Western Creameries Win

Boer Of Exhibiting Highest Grades Of Butter At Canadian National Exhibition Goes To Manitoba

Toronto—Western Canada, represented by creameries in Manitoba, won the honor of exhibiting the highest grades of butter at the Canadian National Exhibition. Judging of butter and cheese, principal items in an industry yielding in excess of \$100,000,000 annually in Ontario alone, concluded recently. George H. Barry, dairy commissioner for Ontario, said he had no excuses to offer for the failure of Ontario entries to outstep those from the west. He was prepared to take off his hat to the westerners for the quality of their work.

The silver cup for the highest scoring creamery butter was awarded to J. G. Gallagher, Winnipeg.

Britain Is Ready To Hold Economic Conference With Dominion In Canada

Montreal—The British Government is ready to hold an economic conference with the Dominion and to hold it in Canada, Lord H. J. H. Thomas, Lord Privy Seal and Minister in charge of unemployment, told the Canadian Club at a luncheon tendered him here.

Mr. Thomas said that he had consulted members of the Canadian Government and made definite proposals, but such matters should first be discussed in Parliament.

He had also talked to heads of many companies, including E. W.

WINS NOTABLE VICTORY

Hon. Philip Snowden, British Chancellor of the Exchequer

Rumors Of Ontario Election In November

But Premier Ferguson and Cabinet Members Turn Aside All Gossip Toronto.—The political pot in Ontario has begun to simmer. Rumors of an election this fall are heard on every hand—but Premier Howard Ferguson and members of his Cabinet have, so far, deftly turned aside all queries with non-committal answers.

The present government was elected December 1, 1926, and in the normal course of events would have more than a year's tenure of office ahead of it. The government has not seen fit to state that an election will be held before the expiration of the regular term—but neither will they say an election will be held.

Hon. W. E. N. Sinclair, Liberal leader, who has been touring various sections of the province, has been predicting an election this fall and has been urging preparations on the part of local Liberal organizations. One source has it that an election would be held some time during the first two weeks in November.

Premier Ferguson has no comment to make on this.

A World's Record

Saskatchewan University Puts Exhibition New Mark Saskatchewan, Sask.—"Lady Victoria," officially known as "Barred Plymouth Rock Pullet No. 440, property of University of Saskatchewan," has laid her 352nd egg, thus establishing a world's record, surpassing that held by White Leghorn No. 351, belonging to the University of British Columbia, which held the record with 351 eggs in 52 weeks, laying her 352nd in the day after the close of the year.

"Lady Victoria" may still beat her own record as her year does not end for some days. The 352nd egg greeted Professor R. K. Baker on his return from a trip as head of the poultry department to the convention of poultry science held at Alabama Polytechnic, Auburn, Alabama.

Secured Farm From Air

Bellingham, Wash.—Traveling 90 miles an hour, an aeroplane secured 160 acres of land in one hour and forty minutes near here. Eight hundred pounds of seed were distributed from a height of 500 feet.

Beatty, K.C., of the Canadian Pacific Railway, who had authorized him to say that he was not only sympathetic to proposals, but thought them a good business.

Mr. Thomas said that he wanted more British capital to come to Canada, and also that it is not a case of absent oversight. He wanted to see British brains and Canadian brains working out the problems with which the Dominion is faced at a period which preceded the growth of the United States, Canada, he believed, in pictures, avoid many of the mistakes of the United States.

Snowden's Great Victory

Popular Enthusiasm Shown In Britain Over Achievements Of Chancellor

London, England—Not for years has there been such popular enthusiasm over the achievements of a British statesman as was last week when the man in the street picked up the late editions of the morning papers, read glowing headlines, such as "Snowden's Great Victory for Britain."

Special editions of the evening papers giving additional details of the reparations agreement, were eagerly bought up as soon as they appeared. As the front page cartoon in Lord Rothermere's Evening News puts it: "The British taxpayers are enjoying their first picnic of years."

The chiefs of the Labor party are naturally elated over the turn of events which non-partisan observers estimate would give the Laborites a solid majority in the House of Commons were a general election to be held tomorrow.

The inclusion in the Hague agreement of an Italian guarantee to pay one million tons of British coal for the next three years is also a feather in the Labor party's cap. Though it actually represents but a small fraction of the total coal output of the British Isles, it looms large in the popular mind as a great boost for the British coal industry. The coal owners estimate that it will give employment to 4,000 additional miners.

The official circles of the city, who had been reported during the last few days as wavering in their support of Mr. Snowden, and who feared the break-up of the conference would prove more disastrous than was warranted by the effort to obtain a couple of million pounds more annually, are now jubilant over the agreement. The bright light of day markets indicated sufficiently the general satisfaction on the London stock exchange.

The chairman of one of the chief cotton manufacturing concerns who is also a director of the Manchester Bank and the Manchester Chamber of Commerce, said Mr. Snowden merits the warmest congratulations on the strong stand he made. It was not sufficiently appreciated abroad what great sacrifices this country had made.

"The time has quite definitely arrived when Great Britain can no longer afford to make such sacrifices. The whole discussion shows there can be no satisfaction for anybody until the whole question of reparations and inter-Allied debts has been eliminated."

"Inasmuch as this country is so dependent on export trade, it is not unreasonable to say it suffers more than any other country from reparations, especially reparations in kind. It is therefore gratifying to know Italy has agreed to purchase a million tons of coal each year up to now she has been getting by reparations."

Seed Cleaning Plant

Manitoba Is Promised Plant Similar To Saskatchewan

Winnipeg—Manitoba will shortly have a registered seed-cleaning plant. It was indicated by Hon. W. R. Motherwell, Federal Minister of Agriculture. "As soon as the Manitoba seed growers are ready, we are prepared to give them a similar service to the one we are providing in Saskatchewan," Mr. Motherwell stated.

To Conquer Namesake Peak

Rockies, Colo.—The result of the continued Jewish-Moslem rising in Palestine, remained acute, although the arrival of additional British troops, and warships somewhat relieved the tension in the larger Palestine centres. Clashes between Arab demonstrators and police in Damascus, many strong demonstrations in Syria and reports of Arab movements in Transjordan, added to the disorders, which continued intermittently in various regions of Palestine. A third French warship has been ordered to Syria, and the French border guard heavily reinforced.

Fighting at Haifa, where Arabs attacked British naval forces, was the most serious reported in Palestine. The Arabs were repulsed by the British, and troops continued their efforts to drive out Jews. The

TOURING CANADA

Randolph Churchill, 18-year-old son of Winston Churchill, who is with his father on a tour of Canada. The photograph was taken on his arrival in Toronto.

Proves Northern Air Route Is Reliable

Mooseport Makes Non-Stop Flight Over Klondike Trail To Dawson Dawson, Y.T.—Completing a non-stop flight of 860 miles from Akluvik, at the mouth of the Mackenzie River delta in the Arctic, the western Canadian Airways Fokker monoplane, equipped with pontoons, arrived here covering the distance in six hours and 45 minutes.

The machine, piloted by S. W. L. Britnell, had as passengers, G. B. Plante, director of the northwest territories and Yukon, his secretary, G. D. Murphy, L. A. Giroux, legal adviser and mechanic W. B. Tull. The flight was instituted by the Dominion Government for purpose of testing the reliability of "ice air" routes and part of its scheme to open up air communications with the remote sections of Canada.

The route followed was via McDougall Pass, made famous during the first Klondike gold rush, down the Porcupine and Yukon Rivers to Dawson.

Resources Will Be Discussed This Fall

Settlement For Alberta and Saskatchewan Is Looked For Edmonton.—Natural resources and the conclusion of negotiations for the transfer to Alberta of its public domain will be up for discussion again some time this fall it is expected by Premier Brownlee.

Asked as to the present standing of the question, the Premier said that no official communication from the Ottawa Government in respect to a new offer has yet been received, but the provincial government has been given to understand in other ways that Ottawa's attitude in the matter is one of readiness to proceed to the Ottawa Government in the case of Manitoba.

Chains Recored

Cincinnati.—Before pulling the ring to open his "chute, Rex Barker, 23, during East Liverpool, O., flyer, leaped 9,000 feet here. He claims the world's record for delayed parachute jump, having stepped from the plane at a height of 11,800 feet.

Rhineland To Be Cleared Of Allied Troops By June 30th, 1930

Route Not Selected

Air Mail Route To Coast Awaits Report From Technical Flying Edmonton.—No selection of a through air mail route to the Pacific Coast has yet been made, declared G. Herring, of Ottawa, superintendent of air mail service for the Post Office Department, when seen on his arrival from Calgary.

Reports will be obtained from technical flying men dealing with service safety and the route offering the greatest rapidity of operation before anything definite will be settled in connection with the through line, said Mr. Herring. There has been an impression that the through line was to run by way of Calgary, or that the southern route would be given the initial try on account of Canmore being selected as the terminus for the service that will open up by way of Canmore, Mr. Herring points out that Canmore was selected as it gave these operating the air mail service two hours less in making connections with the train for the coast. It was not to be taken as indicating the Department's choice of the line, as the coast, as that has not been considered as yet.

Moslem Revolt Serious

British Marines Open Fire In Attempt To Quell Arab Attack

Calcutta.—Arabs attacked the suburb of Tullerham and Jena, northwest of Jerusalem, and advanced behind of Jerusalem, they are according to advice received here from Jerusalem. Ten Jews were wounded in rioting at Belgrade, and part of its scheme to open up air communications with the remote sections of Canada.

The route followed was via McDougall Pass, made famous during the first Klondike gold rush, down the Porcupine and Yukon Rivers to Dawson.

Another report received in Calcutta, that the occupied territory, grave danger, with an army of 2,000 armed Arabs, including Dr. tribesmen, marching on the city.

Urges Shorter Day For Canadian Miners

Six Hours Asked In Resolution To Labor Congress

St. John, N.B.—Six-hour days for miners featured a resolution by Drumheller, Alberta, local union president, which was presented at the opening session of the Trades and Labor Congress, of Canada, here. The resolution stated that inasmuch as the miners were employed for only five months in the year, that an extensive search for wider markets for Alberta coal had failed miserably and that this had been used as a basis for reduction in miners' wages at Drumheller, they, therefore, urged a six-hour day and a five-day week for all miners in Canada.

Atoms Added To Radio Notes

Schenectady, N.Y.—To join the vast army of radio performers, now comes Atom. Small matter, to be sure, but nevertheless audible, as was proven in a recent broadcast over station WGV here.

British Troops Assist In Quelling Disturbances In Palestine Centres

Jerusalem.—The danger of Moslem uprising in Syria and Transjordan, as a result of the continued Jewish-Moslem rising in Palestine, remained acute, although the arrival of additional British troops, and warships somewhat relieved the tension in the larger Palestine centres. Clashes between Arab demonstrators and police in Damascus, many strong demonstrations in Syria and reports of Arab movements in Transjordan, added to the disorders, which continued intermittently in various regions of Palestine.

A third French warship has been ordered to Syria, and the French border guard heavily reinforced. Fighting at Haifa, where Arabs attacked British naval forces, was the most serious reported in Palestine. The Arabs were repulsed by the British, and troops continued their efforts to drive out Jews. The

non-Jewish quarters at Haifa have 15th official, was stoned by a mob at Haifa and killed. G. R. H. Sykes, British, remained active, although the arrival of additional British troops, and warships somewhat relieved the tension in the larger Palestine centres. Clashes between Arab demonstrators and police in Damascus, many strong demonstrations in Syria and reports of Arab movements in Transjordan, added to the disorders, which continued intermittently in various regions of Palestine. A third French warship has been ordered to Syria, and the French border guard heavily reinforced.

Fighting at Haifa, where Arabs attacked British naval forces, was the most serious reported in Palestine. The Arabs were repulsed by the British, and troops continued their efforts to drive out Jews. The

Dairying In Western Canada

Survey Being Made In Saskatchewan To Study Production Costs

A dairy survey of the province of Saskatchewan is being undertaken under the auspices of the provincial government. The problem set is to determine the cost of producing milk and butter for Saskatchewan farmers, both on those where dairying is a major activity, producing milk for the city trade, and those where it is conducted as a side line, and cream is sold for butter-making purposes, or dairy butter is manufactured on the farm.

It is generally believed that a study of production costs will show up strongly different degrees of efficiency, and will encourage farmers who have not made dairying pay in the past to attempt it with somewhat improved methods, or with better foundation stock for the future.

Dairying, and other branches of mixed farming are frequently recommended to farmers as a means of guarding against disaster when short grain crops occur. Those familiar, however, with farm practice, point out that in years of cereal abundance, it may be a burden instead of a blessing, and that some very large losses have occurred in the past by farmers who have been forced to sell their stock owing to lack of available feed, or have tried to carry their stock along on purchased feed. But in years when grain prices are low, or where grain has been known in grade by rural buyers, the stock often give a much better return for grain fed than the market will give.

The increasing tendency toward mechanization of farms, results in a trend toward larger farm units, the employment of less labor, and to a considerable extent the reduction of activities outside of straight grain-growing. This has been part of the cause for the somewhat reduced dairy production of Saskatchewan during the past two years. To what extent it is possible to interrupt this trend, and to what extent, and in what districts farmers should be encouraged to diversify their efforts, is a problem which has by no means been entirely settled. The information which the dairy survey will reveal will probably lead to a much clearer idea on the subject.—The Financial Post.

Tourist Traffic Increasing

First Six Months Showed Larger Number Of Cars Came Through R.C. Port

Approximately 9,000 more tourist cars entered Canada from the United States via British Columbia ports during the first six months of 1929, than during the corresponding period of 1928, according to the Trade Commissioner of Vancouver. His report shows that the increased number of cars carried 20,000 more passengers this year than during the first six months of 1928.

Beauty Of Emerald Lake

The beauty of Emerald Lake in Yoho National Park, British Columbia, lies in the peculiar coloring of its waters and the charm of its thickly wooded shores. Its waters are of a prevailing emerald in color, and in their crystalline depths it is said one can count twenty shades of green at one time but never one of blue. A complete border of jade green forest adds to the loveliness of the scene.

Fish Cannery For Manitoba

According to the "Canadian Fisherman," a fish cannery is being proposed to pack the fish produced in the Manitoba lakes. It is also reported that efforts are to be made to utilize the large available quantity of coarse fish and fish oil from the Manitoba fisheries in fertilizer and stock feed manufacture.

San Marino, a tiny country on the eastern slope of the Apennines, about 40 miles southeast of Rome, Italy, is regarded as the oldest republic in the world.

Amulance man: "His ribs are broken."
Doctor: "Only his ribs!"
Amulance man: "No, his radiator, his front brake, and his back wheel as well."—H. 426, Florence.

W. N. O. 1801

RED CROSS AND THE IMMIGRANTS

The strangers within the gates have their first impression of Canadian hospitality in the welcome prepared for them by the Red Cross Society, at the ports of Quebec, St. John and Halifax. Here, beautifully equipped nurseries provide for weary women and travel-tired children, a haven of rest.

The kindly service of a friendly cup of tea to the adults and milk and biscuits to the little ones, expressed in a simple yet gracious manner, renders the welcome to their future citizens.

Advocates Exercise For Eyes

Would Be Of Great Benefit, Says Member Of Mayo Clinic

Exercise for the eyes was advocated by Dr. Charles Sheard, chief of ophthalmic optics at the Mayo clinic, Rochester, Minn., in an interview recently. The doctor said "setting-up" the morning, looking at the eyes, benefits the eyes as much as they do the body, "eye-rolling" being especially recommended—that is, rolling eyes sideways and upward.

Dr. Sheard said: "The eyes are as lazy as any part of the body and need exercise twice the total valuation of the rest of the body parts, also they can adapt themselves to the need of the modern world." He said the "movies" were not injurious to the eyes. The motor car, though, brings with it a strain on the eyes which was not known in the old days of the horse. "Driving a car is a continual strain on the eyes," the doctor said, "but people are less apt to drive now than they used to and there is no appreciable harm done. The short-lighted driver is often safer than the man who takes long drives."

Result Of Organization

Orkney Islands Have Profited Greatly Through Co-Operative Marketing

An excellent example of what can be accomplished by organization comes from the Orkney Islands. Last year, from that northern outpost of the Empire, 2,600,000 dozens of eggs were exported, the value being more than twice the total valuation of the country. This represents an increase of more than half a million eggs compared with the previous year. In most matters associated with the farming interest, the people of these remote islands are well ahead of the times. For a number of years past they have profited much through the co-operative marketing of their produce.

Birds are rarely sighted by air-men flying at an altitude of 3,000 feet or over.

Waste cotton is utilized in making a high grade of paper.

The Red Cross nurses, register the names of all immigrants, and by means of an admirable system of follow-up, the settlers are put in touch with their provincial Red Cross in the province of their adoption. Thus the peace time program of Red Cross friendships and health service is begun.

Grateful letters of appreciation, from settlers in the far flung outposts, go to prove that there is no greater act of courtesy to a New Canadian than that of the hearty hospitality for which the Red Cross Nurseries are famous.

Phonicians Were Pioneers

First People Known To History To Use Artificial Teeth

The first false teeth known to history were worn by a woman of Sidon, in Phoenicia, about 250 B.C., according to Dr. Roy L. Moodie, well known anatomist. The Phoenician woman's jaw, with the false teeth, is now preserved in the Louvre, in Paris. The two right incisors are replaced by artificial teeth, held in place and bound to each other by gold wire. The wire has been drawn through careful perforations in the setting teeth.

Although the Egyptians pioneered in treatment of many diseased conditions of the body, this sort of dental replacement apparently was never devised by Egyptian physicians. Thousands of mummies, representing seven thousand years of life in Egypt, have been examined but no clear evidence of such repair work has ever been found. It appears that we not only owe our alphabet, and numerous geographic discoveries to the restless, inquiring minds of the Phoenicians, Dr. Moodie points out, but also we are indebted to them for this entrance into prosthetics, which is a particularly valuable field of dentistry.

Manitoba's Gold Production

Figures dealing with gold production in Manitoba during 1928, just published by the Dominion Bureau of Statistics, show a total nearly double that of the entire production of the eleven preceding years. The output in 1928 was 15,813 fine ounces, valued at \$409,571, while the entire output for the eleven years, 1917-27, was 10,339 fine ounces, valued at \$231,653.

Manitoba Town Pioneer

Six thousand boxes of apples is the estimated 1929 crop of the Dominion Experimental Farm at Manitoa, Man., according to a statement by the superintendent. Morley has been a pioneer in apple cultivation in the Prairie Provinces.

One of the great cork-oak trees of Portugal may yield as much as 500 pounds of cork.

Trail Riders in Rockies

1—Resting at the foot of Mount Ball on Shadow Lake, a spot where trail riders have often taken some score of fine trout.
2—Hardy men struggle bathing in a glacial lake from which the trail riders have often taken some score of fine trout.
3—Bathing on a skyline over seven thousand feet high.

Over a hundred members of the Order of Trail Riders took the four day trip from Banff to Castle Mountain, Banff Camp, via Healey Creek, Shadow Lake and the Twin Lakes early in August. Besides the glorious scenery, the exhilarating air and the life in the air, the trail riders enjoyed some first-class trout fishing, and some of the hardier ones even took in a little deer-fur-fel-like bathing. Some of the lakes visited have been seldom seen by tourists in the Canadian Rockies and the trail riders were accordingly pioneers in their travels. The riders came from all parts of Canada and the United States for this annual outing.

Making Correct Map

Experts Are Working On Accurate Picture Of World

So few places remain unexplored that most people take for granted that modern maps give an accurate picture of the world. Yet nearly everyone has a distorted idea of the sizes of most countries and their geographical relation to each other.

The blame lies in the common accepted map of the world which children still study. This map was designed by Gerardus Mercator in 1598, and is known as the Mercator projection, or system of showing the world on a flat surface. It gives a grossly inaccurate picture, writes Karl Voight, in Popular Science Monthly for September.

For instance, the United States appears nearly twice as large as Brazil, although in reality it is smaller. North America is shown as about twice as large as South America, though they are approximately equal in size. Greenland is shown as being larger than Australia, and yet Australia is more than three times as large as Greenland!

The trouble with the Mercator map is that it was designed as a chart for sailors rather than as an accurate picture of the world.

As a result of five years' work, experts in the U.S. State Department Commerce have just completed a correctly-proportioned flat map of the world.

The new map and an accompanying chart on the new map stand for exactly the same number of square miles as any other square map. Distances along the lines parallel to the equator are accurate and true to scale. So also are distances on any one vertical meridian. There is some slight distortion in distances elsewhere on the map, but it is vastly less than on the Mercator projection.

Geographers who have examined the new map have predicted that it will take the place of the old map for all things except navigation.

Amusements Secondary

Work Is Only Justification For Existence Of Man

Work is really as much a necessity to man's well being as eating and sleeping. The neglect of work has also its penalty—deterioration of character. Work is too often regarded in the light of a punishment—unpleasant, but it is to be endured, unless happily it can be avoided. Work is a supreme good. It is the most lasting pleasure. The knowledge of work well done "makes music at midnight," Carlyle, speaking of industry, says: "Work is the cure for all the maladies and miseries of man—honest work, which you intend to do."

The amusements of life can never be regarded as anything more than secondary or even tertiary. Work is the real fun, and it is the only justification for one's existence. When a person has come to feel that work is a burden, and life an annoyance, the only thing worth considering he has really lost his soul.

World's Grain Exhibition

More than \$200,000 will be awarded in prizes at the world's grain exhibition and conference to be held in Regina in 1932. If the present plans and classification prize list are adhered to. These were drawn up at a meeting of the executive recently by the superintendent. Morley has been a pioneer in apple cultivation in the Prairie Provinces.

During the present year there are only 84 days on which the banks are open all over the world.

As Big as Himself

Of course the little fellow in the picture trying to hold this ten-pound steelhead trout, did not do much towards catching him. It took his father 45 minutes to land this fighter which was taken with a black gill on the Stamp River, Vancouver Island, on a July morning, July, August and September are the best months, and the river is located in the Alberni District on the west coast of Vancouver Island, about 10 miles from Victoria, easily reachable by Canadian Pacific Railway.

Newest Automobile Salesman

One Machine Makes and Sells Hot Cakes With Syrup

A dark young man with a restless eye sauntered into a store at Forty-second and Broadway, New York, Stilling up to a change machine he was informed by the directions that if he dropped a quarter in a certain slot, five nickels would be delivered back. The dark young man drew something from his pocket and inserted it hastily at the point indicated.

The change machine accepted the coin with a non-committal click. Instead of disgorging five nickels, it dropped an iron washer into the delivery cup, and from within the cabinet a stern voice spoke: "Please use good coins only!"

For a moment the young man regarded the machine with a sagging jaw, then he took the rejected washer and beat a hasty retreat. His smile of fraud was exposed by the latest machine to join the ranks of the army of robots now serving the American public, writes Frederic Tudman in the September Popular Science Monthly.

Increased demand for automatic sales has brought about 250 manufacturers into the market. They produce about 400 different machines. The first robots had scant vocabularies, contenting themselves with a hearty "Thank you." Now the thanks are often followed by the 10,000 slogans of a hundred servings. A quarter speaks its short piece through a device of wear makes necessary a fresh record.

A robot that rivals the blonde lady who stands in the restaurant window and ditty hips her cakes has been produced by one inventor. The automatic wheat cake vendor, electrically operated, has a magazine which will accept enough dough for a hundred servings. A quarter dropped into the slot entitles the customer to four wheat cakes, and starts a fascinating series of operations. One by one the portions of batter drop on the hot plate. When one side is brown an automatic flipper turns the cake. The machine supplies syrup.

Even gasoline is now sold by machine. The slot takes fifty cents. An adjustment allows the owner to set the amount according to the day's price. At one of the amusement beaches near New York, an automatic shoe sells fifty different commodities by means of mechanical robots. Broadway has a "milk mat" in which eleven machines sell loganberry juice, root beer, orange and the like.

A Good Suggestion

Captain Robert Dollar, of San Francisco, said at the Willard to a Washington correspondent in answer of a pompous politician's defeat: "He was taken down neatly, like the concealed ass in the anecdote. This was said to a pretty girl."

"You know Maud Travers? Well, the poor thing's all broken up over me. I like her, of course, but I could never love her—oh, no, never. I'm very sorry for her, though, and I want to put an end to her situation without breaking the poor creature's heart. Can you suggest any plan?"

"Do you call on 'Maud often?' asked the pretty girl."

"No, not often."

"Call often!" said the pretty girl.

When a woman's teeth chatter they usurp her tongue's prerogative.

Growing Pure Seed Grain

Careful and Punctilious Work In Growing Seed Grain

No good seed grower can grow grain without working over his fields and seed plots, to remove the impurities of "rogues" which he may find in the growing grain. This removing of impurities is called "roguing."

At the present time it is practically an impossibility to grow pure seed grain without carefully and painstakingly going over every foot of the area set aside for seed, and plucking out the odd headed heads from the bald main crop. Even where the seed crop is very good and no really outstanding impurities can be noticed, the careful grower goes over the plots to remove the plants which are not quite up to the high standard set for good seed.

The easier way to "rogue" a seed plot is to walk down the seven-inch path between the drills, and carefully scrutinize all the heads which become visible in each of the three or four drills on each side of the path being followed. By working slowly and carefully, and noting the heads in the six or seven rows as you pass along, all impurities or abnormalities can be quickly detected, and the right-type plants can then be pulled up by the roots. If the plot is particularly bad, turn about and come back on the same row, and in this way a number of off-heads may be found on the return trip.

When the seedling is often run back on the wheel mark, which leaves a 14-inch path down, which is easy to travel at all times for roguing purposes. However, if the fields are dirty with weeds, it is often a bad practice to leave such a place to be rogued, as the weeds will become a nuisance.

By carefully going over the seed plot after the plants have fully headed, and once again just before the grain ripens, most of the impurities can be easily spotted and removed before harvest.

Plants which are thus carefully "rogued" in the manner explained above will contain only pure seed, and subsequent crops should be pure and robust. Most trouble has been lost time than the old, uncareful seed supply.—By J. G. Carl Fraser, Ottawa.

A Versatile Animal

Dairy Cows With Aid Of Chemist Produce a Number Of Things

Stans Stevenson of his truly bovine acquaintance: "The friendly cow, all red and white, I love with all my heart; she gives me cream with all her might, to eat with apple tart. She also gives me the Federal Dairy Research laboratories are spoiling, cut links, dominos, dice, comb, cigar-lighters, pipe-tips, water-proof gum, radio parts, leather polish, paint, paper sizing and spectacle frames. That is, she yields all that products with the aid of the chemist, who takes a quantity of skim milk or whey, does a few things to it and has a nice batch of casing. It is this substance which can be molded and hardened and mixed with other materials to make the various products now announced by the laboratories."

Such resourcefulness in an unhuman domestic animal is to be highly commended, for it makes the ingenuity of the Swiss Farmer Robinson appear dull and obvious. With the family cow and a few test tubes, future castaways on desert isles should lack for nothing.—St. Louis Post-Dispatch.

Our Clay-Working Industries

The clay-working industries in Canada are producing chiefly the manufacture of heavy clay products such as brick, structural tile, drain pipe, and salt-glazed ware, but in several places surface clay of special origin, which are widespread over the country, are used at most of the plants, but shales from several geological horizons are also employed to a considerable extent.

Chinese people have been moving into Manchuria at the rate of about a million a year.

Doctor: "Put this thermometer under your wife's tongue and make her keep her mouth closed for two minutes."
Husband: "Haven't you a thermometer that takes an hour to set?"—Frager Press, Prague.

Determining Period of the Year Most Important For Land To Receive Normal Precipitation

Opinion differs as to the period of the year in which it is most important for the land to receive normal precipitation in order that moisture reserves may be adequate for the growing crops. Recently a detailed study has been made of 15 representative districts over the prairies during the last 12 years, and certain conclusions arrived at on the basis of these 156 instances.

Out of 82 occasions, when Fall and Winter precipitation was normal or above normal, in 73 instances fall to heavy stand resulted irrespective of the moisture condition following after, which in 42 cases was below normal. Fall and winter deficiency was made up by above normal spring and summer rains in only 28 of 74 occasions.

On the other hand, on the 47 occasions when below normal spring and summer rainfall was preceded by above normal fall and winter precipitation, the resulting crops were fair to heavy.

The evidence would seem to point to the fact that, while fall and winter moisture gives no guarantee of a good crop, still it is the most important factor and makes possible a good yield.

An examination of last fall and winter precipitation records reveal that there was need of a rainfall, this spring, considerably above normal if crop prospects were to be regarded in any way as favorable. From September, 1928, to March, 1929, the average rain and snowfall was appreciably less than half normal, not a single weather reporting district receiving its quota.

Coupled with inadequate rainfall, moisture came in unusually dry spring and summer, when April was the only month which even approached normal, while the two critical months, June and July, were two-thirds and a little over one-half of normal respectively.

So far as the present crop is concerned, it required an unusually large amount of spring and summer rainfall which did not come. The results of this lack are now evident.

Advantage Of Rough Seas

Determine Whether Person Is Sane, Says Medical Inspector

There is nothing like a sea voyage—that is a good rough and tumble passage—to determine whether or not you are crazy. This was a declaration of broad human interest recently by Dr. Page, Chief Medical Inspector of Immigration.

Dr. Page points to experience to justify his opinion. This season a dozen immigrants who were apparently normal on embarkation and underwent the medical examination before they did so, were turned back to this side because of displaying mental derangement during or in response to the voyage.

Dr. Page casts no reflection on the examination overseas and the efficiency of the staff that handle it, but that often a rough sea voyage will upset the mental equilibrium and leave it upset. It is a fine test, he said, and he is inclined to recommend it to those who are not quite sure of themselves.

Why She Was Satisfied

It was necessary for taxation purposes to decide which side of the Canadian and United States border a farm which an elderly lady had just purchased, actually lay. Surveyors finally announced that the farm was just on the American side of the border. The lady smiled with relief. "I'm so glad to know that," she said. "I've heard that. Immigrants in Canada are often terribly severe."

Japan's demands for phonograph records have largely taken the work of great composers, whereas in China nine-tenths of the records are traditional Chinese tunes.

Canada's North Country

Railways Lag In Wilderness Justifying Optimism Of Pioneers

Running north between North Bay and Cochrane and thence onwards towards Winnipeg, one looks from an observation car to see marsh and rock and the burny trunks of trees standing in stark ugliness against the sky. Contemplating it all, one marvels at the courage of the men who laid steel along such wastes, at the fortitude of the men who first went into such a wilderness. Yet this country, ugly and so seemingly useless, promises to become one of the richest portions of Canada. The story of what it has yielded and promises to yield in minerals, in gold and silver, copper and nickel, is known to all. And now come word of the discovery of rich coal deposits in the Abitibi River, in the Blackthorn Rapids area north of Cochrane. Coal is promised to be added to the rest of this province's riches.

Providence, truly, has been good to Canada. We have one of the great granaries of the world; a diversified climate that permits us to raise most anything that we need; some of the world's greatest forests; seas and lakes and rivers that thrive with fish, mines that yield wealth; mighty water powers; millions of acres of rich soil. And we are only upon the threshold of development. The great north country, ignored until recent years, promises to open up possibilities undreamed of by our most sanguine optimists less than a decade ago.—Ottawa Journal.

Winnipeg Newspaper Union

The Winnipeg Newspaper Union, which was organized on October 1, last year, a second section set out recently from St. Hubert, Alberta, with passengers unable to obtain accommodation in the regular mail plane. A total of nine persons, six male and three female, embarked aboard the two Fairchild machines for Albany and New York.

Arsenic has been found in appreciable quantities in all organs of the human body.

Welcome Bisley Victor Home

Nothing gives better service or is generally more satisfactory for warm weather wear than bubble rubber. It comes in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. The bubble rubbers are circular shaped so as to give snug fits. Shining appears at each shoulder of modelled neck with V-neck collarless neckline. Navy blue georgette crepe, doublet, printed lawn in red and white, orchid they lined dotted in purple, green georgette crepe, voile in maize shade, printed silk crepe in bright blue tones and black and white printed crepe de chine are included in suggestions. Pattern price 25 cents in stamps or coin coin is preferred. Wm. Co. can carefully.

Could Learn From Canada

Australia Would Follow Example Of Dominion In Dealing With Industry

The Bulletin, Sydney, Australia, says—

Canada doesn't go in for compulsory trade-unionism or basic-wage commissions, or arbitration courts, or anything like that. It believes that the less Government meddles in industry the better for both employers and employees; and as warrant for its belief it can point to prosperous industries, recent wage increases in many trades, low unemployment figures, and comparative freedom from strikes. In 1927 the number of disputes was 78, the number of workmen involved 22,681, and the number of working days lost 165,238. Australia, with its expensive apparatus of industrial tribunals had 441 strikes, 200,767 involved employees, and 1,731,581 lost working days in that same year. In short Canada is beating us badly, and we ought to be proud to let Canada beat us badly though not too proud to learn from its example.

To Have New Industry

Western Foundries, Ltd., Building Factory At Lethbridge

The Western Foundries, Ltd., with a capital of \$1,000,000, has purchased four acres of land in the Canadian Pacific Railway industrial section at Lethbridge. Work has already commenced on the buildings. The Company proposes to manufacture heavy machinery, mining and oil drilling equipment, soil pipes, cast iron water pipes, and brass, aluminum and bronze castings. It is understood that supplies of pig iron will come from the Pacific coast, coke from Michel, and mauling sand from the Lethbridge district.

Air Travel Increasing

For the first time since the daily air service between Montreal and New York was inaugurated on October 1, last year, a second section set out recently from St. Hubert, Alberta, with passengers unable to obtain accommodation in the regular mail plane. A total of nine persons, six male and three female, embarked aboard the two Fairchild machines for Albany and New York.

Arsenic has been found in appreciable quantities in all organs of the human body.

CHARLES FORRESTER

Formerly superintendent of the Canadian National Railways at London, Ontario, who was appointed General Superintendent of the Saskatchewan District, with headquarters in Saskatoon, vice E. T. Chapell transferred.

One Cause Of Road Accidents

Passing Other Cars At High Speed Is Dangerous

All automobile road accidents, like other accidents, are needless, in the sense that they can be avoided. There is always some cause for an accident, and it is only as we guard against the cause that accidents can be eliminated or, at least, reduced. The Montreal Gazette stresses what seems to be the cause for a great many road accidents within recent months as that of overtaking and passing other cars at too fast a pace, and gives numerous instances of fatal accidents which occurred in this way.

Drivers of automobiles need to be in full control of their cars all the time and in all circumstances. There should be no passing of other autos at high speed, especially when the highway is none too wide, or where there are deep ditches on either side. The drivers who take risks in this respect, endanger their own lives and the lives of others. They are acting irrationally and are the cause of many needless deaths that are being regularly reported.—Montreal Gazette.

McClinty: "I've a terrible corn on the bottom of my foot. Pat—That's a foine place to have it. Nobody can step on it but you."

Canadian Poultry Pool Faces Unusual Situation This Year Owing To Over-Production

Grading Of Market Hogs

Department Of Agriculture, Ottawa, Has Issued New Hand Book

The grading of hogs has gone through several stages, each change bringing the grading system into more nearly perfect relationship with the conditions and needs of the industry. The grades, which are now nine in number, and designated as Select Bacon, Bacon, Butchers, Heavy, Extra Heavy, Light and Feeder, Roughs, Sows, and Stags, are clearly defined in a new pamphlet, No. 40, of the Department of Agriculture, at Ottawa. The grading of the hogs is done by official graders at stock yards, abattoirs, and at such other points as may be found necessary from time to time. New weighing points or centres may be established on the recommendation of a provincial swine breeders' or producers' association.

The fact that the centres already in operation do not adequately serve the territory in question. The utmost care has been taken by the Live Stock Branch of the Department of Agriculture, to meet every contingency that may reasonably arise in order to give effect to proper grading, which at all times gives first consideration to the rights of hog raisers. This pamphlet, numbered 40, which is a handbook on the bacon hog and hog grading, describes and defines the different breeds suitable for bacon, and good, bad, and indifferent types of market hogs.

Provincial Turkey Show

Saskatchewan Exhibitors To Have Large Section At Winter Show

The management of the Saskatoon exhibition has promised to provide facilities for a large turkey section at the time of the annual poultry show. The exhibitors are holding their coming winter. This will constitute the provincial turkey show, explained Professor R. K. Baker, at a meeting of the executive of the Saskatchewan Turkey Breeders' Association recently.

With regard to turkey exhibits at the World's Poultry Congress, in London, England, next year, the executive expressed willingness to co-operate with the poultry committees in the preparation of Saskatchewan exhibits.

Saskatchewan turkey exhibits at the Toronto Royal this fall, it was announced, will have the advantage of the supervision of the well-known exhibitor, R. H. Stapleton, who will accompany his own birds to the show and will be offered to host after the close of other Saskatchewan exhibitors.

The executive drew up recommendations in regard to handling and inspection of turkeys for submission to the Department of Agriculture.

Taking Waterfowl Census

Canadian and United States Societies Are Co-Operating

The National Parks of Canada, Department of the Interior, and the United States Biological Survey, are co-operating in the taking of monthly waterfowl censuses throughout Canada and the United States. These censuses are being taken in order to obtain information concerning the numbers, distribution, and migrations of wild ducks, geese, swans and coots throughout both countries for the purpose of aiding in the administration of the Migratory Birds Convention Act.

Canada Will Exhibit

Canada's official participation in the six weeks' British Empire Trade Exhibition, to be held at Buenos Aires in the spring of 1931, has been announced by the Department of Trade and Commerce, Ottawa. The exhibition will be staged in the world famous Palermo Park where the Argentine Rural Society annually stages its stock shows.

Growing Turkish Tobacco

The latest experiment in Essex County, Ontario, the growing of Turkish cigarette tobacco, has been a success, early reports indicate. The Turkish plant is showing as good production in this county as in Macedonia, which has been the centre of Turkish leaf culture for centuries.

Upton, England, has erected a sign "Billposting prohibited in this village."

Woodpeckers rarely disfigure a healthy tree.

The Central Company of the Canadian Poultry Pool, Limited, was faced with a situation unparalleled in the history of egg marketing in Canada in the early part of the present year, according to a review of the 1929 egg season, issued by the Saskatchewan Co-Operative Poultry Producers, Limited.

It appeared the season's production was considerably in advance of the consumptive requirements.

Toronto and Montreal had in part provided a ready market for the greater percentage of the Western surplus, says the review, but this season's production was so increased in those provinces by local production, that an over-supply was soon apparent on the Montreal Market. In consequence the poultry producers had to look for other markets.

Great Britain, the only open market where the provincial producers had been looking for a ready market, had been ruling approximately six cents under that of last year, it was stated.

Putting up eggs for export into the best grades of other markets, the statement warns. Eggs affected by heat cannot be exported. Under such circumstances, the Western surplus, and cracks, are not wanted in Great Britain.

At the last three months 40 per cent. of the eggs marketed in Western Canada by merchants have been under-grades, says the review.

Under-grades tend to go into Canadian markets well supplied with high-grade eggs, a market had to be found for the large surplus of under-grades.

The situation was met during April, May and June, by packing out into foreign about 50 cars of under-grades, but once the requirements of frozen eggs were supplied under-grades had to go into Canadian distill consumption. The result was over-supply, and it has not been possible to get such low as 11 territory getting them as low as 11 cents per dozen.

The problem facing egg producers in Western Canada, is to eliminate under-grades, and proper feeding will be made shortly. A large number of under-grades, and elimination of male birds from flocks would materially assist in solving this problem.

In view of the market situation, the orderly marketing of Pool merchants' eggs has obtained for the egg producers at least five cents more per dozen. Had merchants marketed through independent dealers the markets would have been completely demoralized.

It was believed that the poultry pools of Western Canada, through central co-operation, the Canadian Poultry Pool, Limited, have accomplished this season, beneficial results which would have been impossible under any other system.

Farm Loan Payments Soon

Plans For Scheme In Alberta Are Practically Completed

First payments under the Alberta Government Farm Loan Scheme will be made shortly. A large number of carefully selected applications are in the final stages, and loans that have been approved by the Edmonton Board, and the all-Canadian Board at Ottawa, are in the hands of the officials who are preparing the mortgage papers. When all legal papers are disposed of the actual cash payments will be commenced.

Poor (excitedly to landlady)—"Mrs. Jones, I've sold my poem called 'Ode to a Fair Lady' for five cents."

"Have you? Well, you'd better be writing one called 'Ode to a Landlady'."

Tommy: Did you have influenza as bad as I did? I had to stay away from school for three weeks.

John: I had it worse than that—I had it in the holidays.

"How did you find yourself after Oetern's party?"

"Oh, I just looked under the table and there I was"—Karlström's Oslo.

WORLD HAPPENINGS BRIEFLY TOLD

Flying officer W. W. P. Stewart, of the Royal Canadian Air Force, has been transferred from Jericho station to the Winnipeg service.

Fifteen persons were drowned when the Spanish steamer "Gigón" and the British tug "Clara's Cross" collided in the North Sea 30 miles off the Humber.

Warren Packard, 35-year-old killer, when his private seaplane crashed into a marker in a marsh near Grosbeak Point, Mich.

Information of the system of education for Japanese girls was discussed by representatives of public and private girls schools throughout the Empire in a recent three-day conference at Tokyo.

A regular Arctic mail service between Fort McMurray, Alberta, and Akivik, Northwest Territories, via northern trading posts, will be inaugurated early in November, according to an announcement by Gen. Peter J. Venot, postmaster-general.

A short British army aeroplane, manned by a crew of seven, crashed shortly after taking off from the Heliopolis aerodrome. Three of the aviators were killed, including the pilot, and the other four badly injured.

Mail taken off the Canadian Pacific steamer Montserrat, which reached Rimouski recently was delivered at the addresses in Montreal during the morning, and in Toronto, Hamilton, London and Windsor during the afternoon.

Discovery of hematite, which would be of greatest importance to Canada's iron and steel industry, has been made on an island on Lake St. Joseph, by George Watts and R. A. Jennings, well-known prospectors. The ore body is said to be a mile wide and four miles long.

Another Problem Solved

Missionary Wants Used Razor Blades For African Natives

What do you do with your old razor blades? Some people use them up for sharpening pencils, but there is a limit to the number of pencils sharpened on regular blades. Others simply allow them to accumulate, to the annoyance of their women folk. But the blades which are a nuisance over here may be valuable in other lands. Some months ago a well-known missionary asked for a hundred razor blades, which could not be disposed of otherwise, to be sent to him and he collected about 300,000 of them.

These blades are much prized by the African natives among whom this missionary works, and one fifty-penny football match recently it was found that they were the popular choice as prizes for the winning team.

A Youthful Steward

Fifteen-Year-Old Boy Is Serving On Graf Zeppelin

The youngest member of the Graf Zeppelin crew contemplates the world through serious eyes and believes he may grow up to be a good "airshipman," if he studies hard. His name is Ernst Fischbach, 15, and he shipped aboard the dirigible April 10 as a steward.

"I always wanted to be a steward," he said, "but now I may become an airshipman if I study."

Ernst was aboard the Graf Zeppelin last spring when dangerous storms compelled Dr. Eckener to turn back. He is small, with an unusually serious face for a youngster.

New Breed of Sheep

A new breed of sheep, specially adapted to find a living on poor land where some breeds would be unable to subsist, and at the same time yielding a good 10-per-cent fleece of high quality wool, was exhibited by Leeds University at the recent Royal Show, held at Harrgate, England.

Conquer Mountain Peak

Party From New York Succeed In Scaling Mount Alexander

After baffling Alpinists for many years, Mount Alexander has at last yielded. The great peak which stands near the Continental Divide, near Prince George, B.C., rises to more than 11,000 feet in altitude and is surrounded by what has hitherto been impregnable ice. The first ascent was made by Dr. Andrew Coleman, of New York, accompanied by Miss Helen Buck, Dr. Mary Godard, Potter and Frank Waterman of the same city, and J. Wain and R. Comstock, of New Jersey.

They were in Jasper on their way home after the victory, all except Wain, who plans to attempt conquest of Mount Robson. The party, outfitted by "Curly" Phillips, well-known Rocky Mountain guide, went out from Devona, through the Smoky River country and returned by way of the Main Divide, among the other peaks they scaled were Resplendent and Chowa.

More Powerful Motors

For New Zeppelins

Would Ensure Trans-Atlantic Service Regardless Of Weather

Dr. Leister Kelp, director of the Hamburg American Line, who was a round trip passenger on the recent flight to the U.S. of the Graf Zeppelin, has stated that the steamship company would probably participate in financing the new Zeppelins. These, he said, would be equipped with more powerful motors that would enable an average speed of nearly 80 miles an hour and be capable of providing regular trans-Atlantic service regardless of weather. He anticipated that within a few years the U.S. would be relieved from \$2,000 to \$1,000.

Winnipeg Newspaper Union

For Smart Junior

Two-piece is important school fashion for little girls of 6, 8, 10, 12 and 14 years. Style No. 599 is ever so smart with its light fitting hip-line and box-padded skirt which is attached to a camille bodice. The applied trimming band at neck and down left-side front affords splendid contrast. Sleeves are gathered into narrow cuff bands. It is sketched in printed and plain wool jersey in soft blue tones lovely for immediate wear and later for classroom. Middy blue wool crepe with vivid red crepe, French blue sports woven linen with blue and white dotted linen, red and white printed plaid with plain red, all in short of the height of a new tail. With its 62 stores and its total height of 840 feet, this lofty corner should be one of the sights of the world. Britain's most elevated spire, that of Salisbury Cathedral (merely 400 feet) quite pales in insignificance thereby, and the distance from the ground of the cross of St. Paul's would have to be added to the height of Egypt's Great Pyramids before it equaled that of the New York giant.

Historic Apartment Has Been Preserved

Room in London Where Y.M.C.A. Was Founded 83 Years Ago

It is just a little more than 85 years ago since Sir George Williams, then a humble shop assistant, founded the Young Men's Christian Association. He held the first meeting in his bedroom, which is now above a dry drapery shop in St. Paul's Churchyard. The room and his bed are preserved intact, for when rebuilding was in progress, the structure was lifted bodily from its floor to its present position. Pilgrims from every part of the globe visit the historic apartment to pay homage to their founder. The association later engaged a room in a coffee house for half a crown a week.

The Newest Skyscraper

New York Building Almost Equals Height Of A Mountain

It is extraordinary to reflect, writes "Looker On" in the London Daily Chronicle, that the new building to be erected for a bank in Wall Street, New York, will be only 190 feet short of the height of a mountain. With its 62 stories and its total height of 840 feet, this lofty corner should be one of the sights of the world. Britain's most elevated spire, that of Salisbury Cathedral (merely 400 feet) quite pales in insignificance thereby, and the distance from the ground of the cross of St. Paul's would have to be added to the height of Egypt's Great Pyramids before it equaled that of the New York giant.

Compass Needle Changes Direction

At Churehill, on Hudson Bay, the magnetic compass needle pointed 24 degrees west of north in 1760, one degree west in 1800, and 10 degrees east in 1860. In other words, during two centuries the needle changed its direction by 34 degrees.

Justice—Was the prisoner drunk or sober—Can you tell?

Officer—Drunk as a judge.

Justice—You mean "drunk as a lord."

Officer—Yes, lord.

Old Settler Deported

Violated U.S. Immigration Laws

John Donaldson Ross, Scottish dairy expert, who unwittingly violated the immigration law quota by moving into Willow Glen, Montana from Canada several years ago, was deported back to Scotland, on the liner Adriatic, despite all the efforts of the Anaconda Copper Co., his employers, to keep him here.

With him went his wife, born in Scotland, but reared in Canada and his two small daughters, one born in Canada and the other in the United States.

They arrived at Ellis Island after a long trip across the country from Montana, aboard a special train filled with other deportees, many of them recruited from penitentiaries and asylums. Ross came from Scotland to Canada eight years ago. There he married, and one daughter was born to the couple before they crossed into Montana.

Somebody informed immigration authorities that Ross was living in the United States in violation of immigration laws, and he and his family were ordered deported. Ross was not even permitted to back to Canada.

A Good Field For Ideas

Author Thinks United States Ready To Take Up Anything

It has been discovered that America, being to longer a community of states but a country whose full extent can easily be reached by such facilities, is a fruitful market for any idea pushed by money and zeal. Mr. Charles Merz has put the matter quite in its entertaining book, "The Great American Band-Wagon."

"Certainly the calendar has lost the dash and uneventful look it had when only Washington's birthday, Memorial Day, Fourth of July, Thanksgiving Day, and Christmas stood out in red to brighten it. The calendar has picked up Weeks. When Go-to-Church week ends, Apple week begins. When Apple week is over, safety week begins. The conscientious citizen has his hands full. Beethoven week follows on the heels of Brush-Your-Tooths week, and when everybody's books are balanced at the end of Thrift week it is time to plant a Tree. Smile week, Clean-Up-the-Yard week, Get-out-the-Vote week, Book week, Father-and-Son week, and Pay-Your-Bills week come a rush together with Courtesy week, Learn-to-Swim week, Education week, Brake-Test week, Fire Prevention week, Constitution week, Boost-Your-Own-Town week, Better-hearing week, and Better Homes week right behind them. Take-a-Bath week has recently been added at the suggestion of the Cleanliness League of North America."

New Atlantic Airways

All-British Service Links Canada With South America

To provide an all-British service for transport of passengers, freight and mail between Canada and South America, a company called the Atlantic Airways, Limited, has been formed. The immediate object is service for the British West Indies. If the larger project is carried through, Canada will be linked by air with Brazil and Argentina, as well as the principal West Indian islands and British Guiana.

Information Later

Two farmers met in town a few days after a cyclone hit the country-side.

"Yes, it did quite a bit of damage out our way," said one reflectively. "By the way, Hank, was that new barn of yours injured any?"

"I can't say rightly," he answered slowly. "I ain't found it yet."

Some of the earliest clocks had no dials. Only the hourly striking told the time.

The finest crown in the list of Russian crown jewels is decked with 32,900 carats of diamonds.

Most of the bacon eaten in Britain is imported from Denmark.

Recipes For This Week

(By Betty Barclay)

CUSTARD SUFFLE

3 tablespoons butter.
1 cup flour.
1 cup sugar.
1 cup scalded milk.
4 eggs.
1/2 teaspoon salt.

Melt butter, add flour, and gradually add milk. Bring to boiling point and pour on to yolks of eggs beaten until thick and lemon-colored, mixed with sugar and salt. Cook. Fold in whites of eggs beaten stiff. Turn into buttered dish and bake from 30 to 35 minutes in slow oven. Take from oven and serve at once. Serve with hard sauce, whipped or plain cream.

PEACH JAM

10 pounds peaches.
6 pounds sugar.
2 cups water.

Peaches that are too soft for canning may be used for this delicious jam or bread spread. Remove stones and cut in slices. Add to water in the preserving kettle. Cover and cook until thick and jelly-like, then pack in hot jar and seal.

Puzzled Father: "Why are you and your little sister always quarrelling?"

Small boy: "I don't know, unless I take after you and she takes after mamma."

The most expensive animal to keep in captivity is the walrus. Its food bill is \$2,000 a year—a sum which would supply three elephants with food during the same period.

Bartholdi's Statue of Liberty was presented to the United States, at Paris, July 4, 1884.

Moore—"Sandy has tremendous strength in his fingers. How did he get that way?"

Sporer—"Using up the last quarter-inch of his lead pencil!"

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

THIS sun is the all-powerful life producer. Nature's universal, disinfectant and germ destroyer as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of health and hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, and that ordinary glass is actually excluding these vital health-giving rays. The glass substitute of WINDOLITE has completely satisfied the healthful requirements of the modern age. It has conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that it has a most beneficial effect on the growth and development of plants and animals, and on the well-being of cattle, enabled for the first time to breathe the healthy light instead of darkness in their stalls.

Indeed, the discovery of WINDOLITE has during the last few years completely revolutionized gardening, given a new stimulus to poultry raising, and has completely increased the capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Price \$1.50 Per Square Yard, L.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS AND YOUR CATTLE Bask in 100% Sunlight. Read for booklet "WINDOLITE"

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Studio, Inc.

SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway revue producer. Molly, the ballad singer at Blackie's, who had treated Al disdainfully, moves up to him when she finds he is on the way to fame. They are married, and Al, and John Perry, Al's best friend, become a famous revue performer. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowledge, is left behind. Molly and John Perry, Al's best friend, become a famous revue performer. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowledge, is left behind. Molly and John Perry, Al's best friend, become a famous revue performer. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowledge, is left behind.

CHAPTER XI

The months passed; the time approached for Molly's baby to be born. During that period, Molly was kinder to Al, and more solicitous of his welfare. And, somehow, she and Al did not see John Perry much. Perry seemed to be called out of the city a great deal of the time in business.

At Al went about his work in a daze of happiness. At home was his lovely Molly, quiet-eyed, soft-spoken, patiently waiting. Undoubtedly the mystery of the approaching event had changed her for the better, and, as Al predicted, she too wanted the baby.

Then the night came when she was rushed off to the hospital, and Al paced the white corridors, sat down in the reception room, tried to read the disengaged magazine he saw lying about, smoked countless cigarettes—and waited for the good word. Occasionally a white-robed nurse passed, giving him a sympathetic glance. Then the moment came when one of these nurses beckoned to him. He sprang forward.

"You may come now, Mr. Stone. The baby's born."

"How is it, what is it?"

"It's splendid! It's a boy."

"And how's Molly?"

"She's splendid, too."

Al tiptoed softly into the white room, behind the nurse. There was Molly, bolstered up slightly by pillows, paler than he had ever seen her before. She gave him a faint smile. And lying beside her was a small bundle, which suddenly gave off a high, piercing wail. Al stepped over, ever so cautiously, until he stood beside the bundle. Then he looked down into the wrinkled, red little face.

"Isn't he beautiful! He's a boy!"

While the nurse quickly slipped her hand over her mouth to hide a broad smile, Al leaned over Molly and kissed her gently. He felt one of her arms go weakly about his neck.

"Are you happy?" she whispered. "Oh, yes! I'm happy! You're both of you just wonderful!"

"Yes! I'm happy too," murmured Molly, and suddenly she began to cry. Al was astonished, but he patted her lovely golden hair, and re-

his songs and he insisted that her photograph appear on every one of the music giant covers and that her name appear in type twice as large as his own name.

Yet a close observer would have seen that Molly wasn't happy. She had fame, money, a happy home, an adoring husband and a beautiful child, yet something seemed to be missing. Frequently she was busy at home and sharp with Al. But Al loved her so and was so happy with Junior that he passed over these temperamental outbursts.

John Perry had called more frequently after Molly's recovery and return to the stage. He often dropped in at the sumptuously furnished Stone apartment and every so often he took Molly to dinner when Al was busy with a song that had to be finished in a hurry.

At Blackie Joe's place, just off the Village, Grace Farrar heard news of Al and Molly as it percolated down from Broadway. When she learned of Al's baby, there was a little sharp pain in her heart for a moment, then she smiled radiantly and dashed out to send Al a congratulatory telegram. So Al and Molly had a baby! Grace wondered what it was like and longed to see it.

Grace was walking on the Avenue, window-shopping and dreaming, when she saw Molly's face at the window of a shop, superciliously looking at the passerby. The district had experienced a long dry spell, and the stock had been able to get some snatching at the hayricks. Mr. Ross had been feeding 3,000 more haggets on maize and, and eventually he decided to start to rice. For several weeks, and the drought broke, the sheep were given half a pound of rice five days a week, and on Mondays and Thursdays they were fed on wheat hay. The sheep thrived on the unusual fare, and are in excellent condition.

Then a strange thing happened. As the driver of the Rolls-Royce passed to start his car with the change of lights, Grace distinctly saw the handsome man who had Molly slip his arm casually and possessively about her. As Molly turned to smile at him, Grace noticed that she was smiling at a man who was smiling at her. Grace stood rooted to the spot in amazement.

(To Be Continued.)

May Join Expeditions

Great British-Like To Ask Canada To Take Part In Polar Expedition

Canada and Australia may be approached in connection with British expedition to the North and South Poles for exploratory and meteorological purposes within a few years. Leading meteorologists of the Empire met at the conference at the Admiralty to consider weather forecasting in relation to the Empire's interests in the polar regions. The conference was held at the Admiralty, and the British meteorological officer, said Great Britain had one of the most ably organized meteorological services in the world.

"We cannot allow exploration of the polar regions to be done by foreign ships alone. It is up to us to take a real share in it. If there is going to be a definite attempt to investigate the polar regions, north and south, in 1932, we must be prepared to take our part. We shall approach Canada and Australia about sending out expeditions."

A British-Australian expedition is already on the first leg of its journey to the polar regions of the south under Sir Douglas Mawson, but the purpose of this expedition is mainly scientific study of the economic and fishing resources of that section of the world.

Knowledge of meteorology was a vital need of the success of Imperial transport, Lord Thomson, Secretary of Air, pointed out. He believed that in a few years, ships and aeroplanes might be guided just as ships on the seas were navigated at present, but if this was to be brought about there would have to be a great advance in meteorology.

A Notable Record

In 1882, Arthur Hawkes takes in an article in the Winnipeg Free Press. Brandon had seven lawyers. Four, Clifford, Sifton, Arthur Sifton, Thomas Mayne Daly, and George R. Caldwell were Cabinet Ministers, two, W. A. Macdonald and A. Henderson, judges in British Columbia. That record can hardly be beaten in Canada.

Sir William Morris, Great Britain's leading automobile manufacturer, has announced that every motor car imported to the British Isles means the loss of a year's work for one Englishman.

Clouds are sometimes too miles thick.

Chew and Grow Thin

You know that certain foods furnish body energy without adding uncomfortable fat.

Sugar is one of these foods, supplying needed energy in concentrated form. WRIGLEY'S gives you sugar and flavor. These ingredients dissolve in your mouth.

What pleasanter way of taking sugar?

Thrive On Unusual Fare

Australian Finds Ice Is Good Fare For Sheep

James R. Ross, owner of Ural Fries sheep station, on the Murrumbidgee River, Australia, in what is known as the Riverina District, has achieved success in feeding his sheep rice. The district had experienced a long dry spell, and the stock had been able to get some snatching at the hayricks. Mr. Ross had been feeding 3,000 more haggets on maize and, and eventually he decided to start to rice. For several weeks, and the drought broke, the sheep were given half a pound of rice five days a week, and on Mondays and Thursdays they were fed on wheat hay. The sheep thrived on the unusual fare, and are in excellent condition.

Internally and Externally It Is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints. Externally, for sore throat, croup, whooping cough, pain in the chest, and many other ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

German People Favor Canada

Believe Conditions Has Best Working Conditions In Canada

Western Canada is an excellent country to come to, for not only are working conditions better than elsewhere, but the new immigrant can get to start on the soil at a very low cost, said Kurt Martin, new German consul for the four western provinces, speaking in Regina before members of various German societies.

Mr. Martin said that Germany had no definite immigration policy and though her people were encouraged to go to the African colonies, they preferred Canada where friends had "made good."

Why suffer from corns when they can be painlessly rooted out by using Holloway's Corn Remover.

Ancient Tree Destroyed

Five-Hundred-Year-Old Elm In England Had To Be Cut Down

An elm tree 500 years old in Hagley Wood, Barnet, under which Bishop Latimer preached in 1535, has been destroyed by fire. The blaze started among dead leaves in a cavity in the trunk. The tree, which was of enormous girth, was said to have been one of the largest elms in the country. Henry VIII, when on his way from Hatfield House to London, heard Bishop Latimer preaching under it.

Her Little Boy

Was Very Ill With Summer Complaint

Mrs. Ray Fisher, Lehigh, Pa., writes: "For over a month last summer, my little boy was suffering from summer complaint. He got so bad there began to be traces of blood in his stool, and anything he ate would not stay on his stomach very long. He became so weak he could not stand up. A neighbor recommended Dr. Fowler's Kidney and Bladder Pills. I had tried, but to my surprise, I noticed a change after he had taken a few doses, and before the week was over he was healthy. He was the same happy, healthy boy he was before he was sick."

Britain's Atlantic Fleet

Finest Naval Unit In Existence and Largest In World

The Atlantic fleet becomes the greatest single fighting force in the world by the decision of the admiralty to recall five battleships of the Queen Elizabeth class from Mediterranean waters to home ports and the Atlantic fleet.

The transference of the battleships, not only an important change in distribution of the navy, but an entirely new departure in British naval policy, means the balance of power is removed from Malta and Gibraltar to the Atlantic.

The Atlantic fleet will consist of 14 capital ships, among them the two most powerful vessels in the world, the Rodney and Nelson, and the largest battle cruiser in the world, H.M.S. Hood.

The Queen Elizabeth vessels are approximately 30,000 tons, armed with eight 15-inch guns. These five will replace the two Nelson class vessels, the Hood, the four Iron Duke battleships, and the battle cruisers Renown and Repulse, to make the most formidable fleet assembled on peace time duty in the world.

Officially the lack of adequate harbors in the British Isles is the reason for the removal of the battleships. But there is more behind the decision than a mere question of detail. One suggestion is that the Admiralty is influenced by the fact that these big ships will now give the British dockyards a great deal of maintenance work to compensate for the loss by reduction of the replacement program.

The British fleet in the Mediterranean will be cut to five capital ships and four of the newest "Washington" 10,000-ton cruisers.

Little Help For This Week

"And the Lord shall help them, and deliver them, because they trust in Him."—Psalm xxxiv. 40.

Prayer is in its faith, for not in misapplied confidence upon the Father, but in God in sorrow and roared for His rain.

Prayer is as the wine, nor are His ways other than, but by their better.

Of beauty infinite and love intense, set on. One day, beyond all thought of praise, you will crown them with its rays.

Have faith in God, think noble things of God; be sure that trust in the righteous God means the ultimate triumph of good over evil.

—Frederic W. Farrar.

Stop Colds With Minkam's Liniment

Owns Property in New York

Valuable Real Estate Is Held By King George

Among the owners of valuable real estate in New York is King George V. of England, it is revealed by the Associated Press. Several Fifth Avenue sites and plots of land owned by a Manhattan land agent held by the British crown.

Among them is reputed to be the site of the great avenue, of the show street which has the "largest round window in the world"—a cylindrical shaft of glass completely enclosing a show-case floor which is lowered like an elevator to the basement to be trimmed and then lifted again hydraulically into place.

All the properties of the British monarch are in the custody of a holding and management corporation downtown. It frequently adds to or disposes of this or that other realty under its care, but never makes public the complete list of what it thus secret the exact locations here of the holdings of its royal agent.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by giving Mother Gray Worm Expeller, an excellent remedy.

Can Be Relied On

The same engines and boilers which British engineers installed in the "Mauretania" in 1907, drove the ship across the Atlantic on her record trip recently. The British workman is always reliable and thorough.

Horse sense is properly much praised, but automobile sense now-rules is even a more valuable commodity.

Actress: "Did he really tell you I had stage fright?"

Her rival: "No, he said you were one!"

The first clock was made in the thirteenth century.

Kill that corn with Minkam's Liniment.

MOST people rely on Aspirin to make short work of their headaches, but did you know that Aspirin can bring such complete comfort without delay, and without harm; it does not affect the heart. In every package of Aspirin you will find proven directions which everyone should be familiar, for they can spare much needless suffering.

Aspirin is a Trademark Registered in Canada

Big Job Ahead

One Man Starts Work On Millions Of Books In British Museum

One lone man is working on the job of renovating the 20,000,000 volumes in the British Museum, London. For the past fourteen years he has been rehabilitating the dusty volumes in this world famous museum, and there are only 18,700,000 more to fix. If his present rate of progress continues, he will complete the task in just 1229 more years—unless somebody publishes another book in the meantime.

SAVE THE CHILDREN

In Summer When Childhood Ailments Are Most Dangerous

Mothers who keep a box of Baby's Own Tablets in the house may feel that the lives of their little ones are reasonably safe during the hot weather, stomach troubles, cholera, infantum and diarrhoea carry off thousands of little ones every summer. In most cases because the mother does not have a safe means of giving relief to her baby. Baby's Own Tablets relieve these troubles, if given promptly. The well child they prevent their coming on. The Tablets are guaranteed to be absolutely harmless even to the newborn babe. They are especially good for infants because they regulate the bowels and keep the stomach and bowels happy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Creditable Record

A Sussex lady who recently celebrated her hundredth birthday received a model from the British Red Cross Society for her War services which included sewing over 400 shirts for the men at the Front.

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderful. I have had six children of which four are living and no younger is born. My baby boy now eight months old weighs 23 pounds. I have taken your medicine before each of them was born. I have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."

Mrs. Milton McFarlane, Vancouver, Ontario.

Lydia E. Pinkham's Vegetable Compound

Prepared by Dr. J. C. Pinkham, Lowell, Mass.

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It is not. The stomach nerves have been overstimulated. There is excess acid. The way to correct it is to take a few pills in time. It is the right way in Phillips' Mints of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard of the physicians in the 50 years since its invention. It is the quality. It is the approved method. You will never use another. It is the quality. It is the approved method. You will never use another. It is the quality. It is the approved method. You will never use another.

Dr. Williams' Pink Pills for Pale People. It is the quality. It is the approved method. You will never use another. It is the quality. It is the approved method. You will never use another. It is the quality. It is the approved method. You will never use another.
